

Immersive LED Display Solution

—
Transforming Spaces Where Innovation Meets Immersion

Explore the Future of Immersive Visuals

Pushing the limits of visual technology, MileStrong's immersive LED display solution redefines spatial communication in the digital era. Whether in architectural design, creative production, or experiential installations, this solution integrates advanced engineering with artistic vision, delivering immersive environments that inspire innovation across industries.

Three-Sided Immersive Display with Floor

What's a Three-Sided Immersive Display with Floor?

An innovative digital environment combining two wall screens and one floor screen to create an engaging and interactive viewing experience.

Features

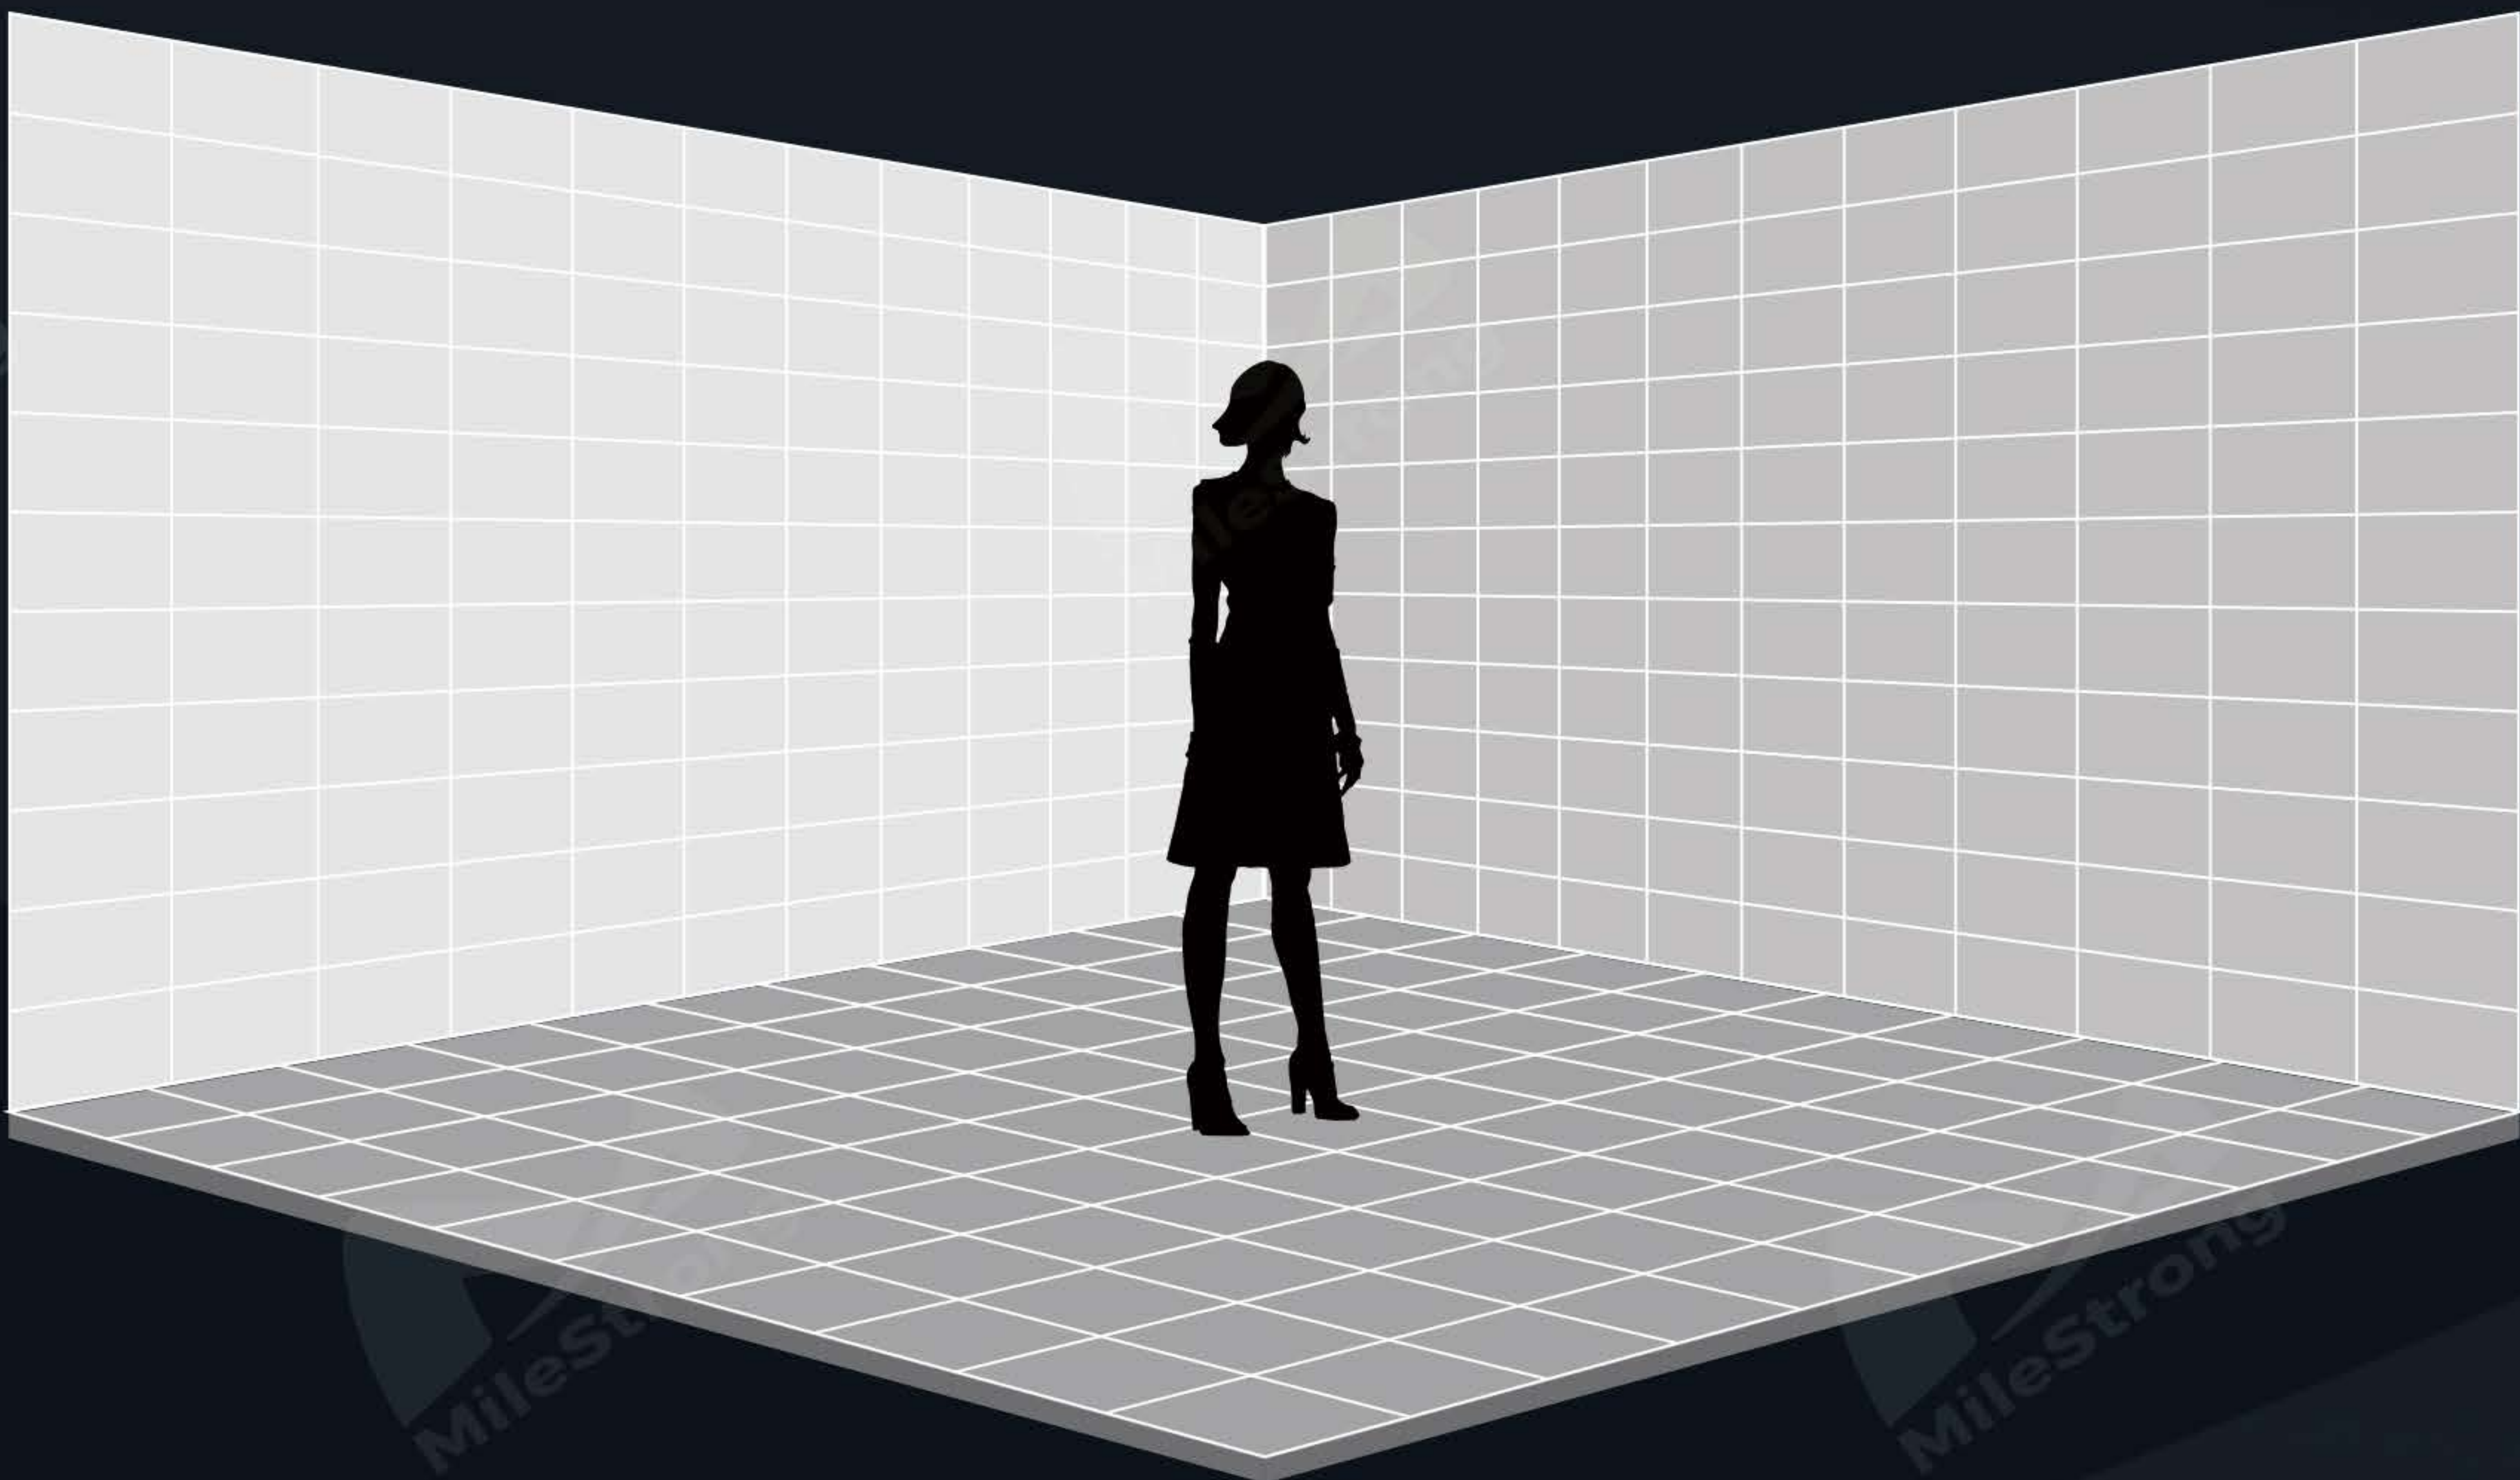

- Two high-resolution wall screens
- One floor screen for immersive visuals
- Seamless display connection for a cohesive experience

Audience Experiences

- Enhanced depth perception
- Immersion from multiple angles
- Unique storytelling engagement through floor interaction

USPs

- Ideal for exhibitions, events, and showrooms
- Easily adaptable to different spaces

Four-Sided Immersive Display with Ceiling

What's a Four-Sided Immersive Display with Ceiling?

A next-level immersive solution featuring one ceiling screen and three wall screens, offering a complete overhead and surround viewing experience.

Features

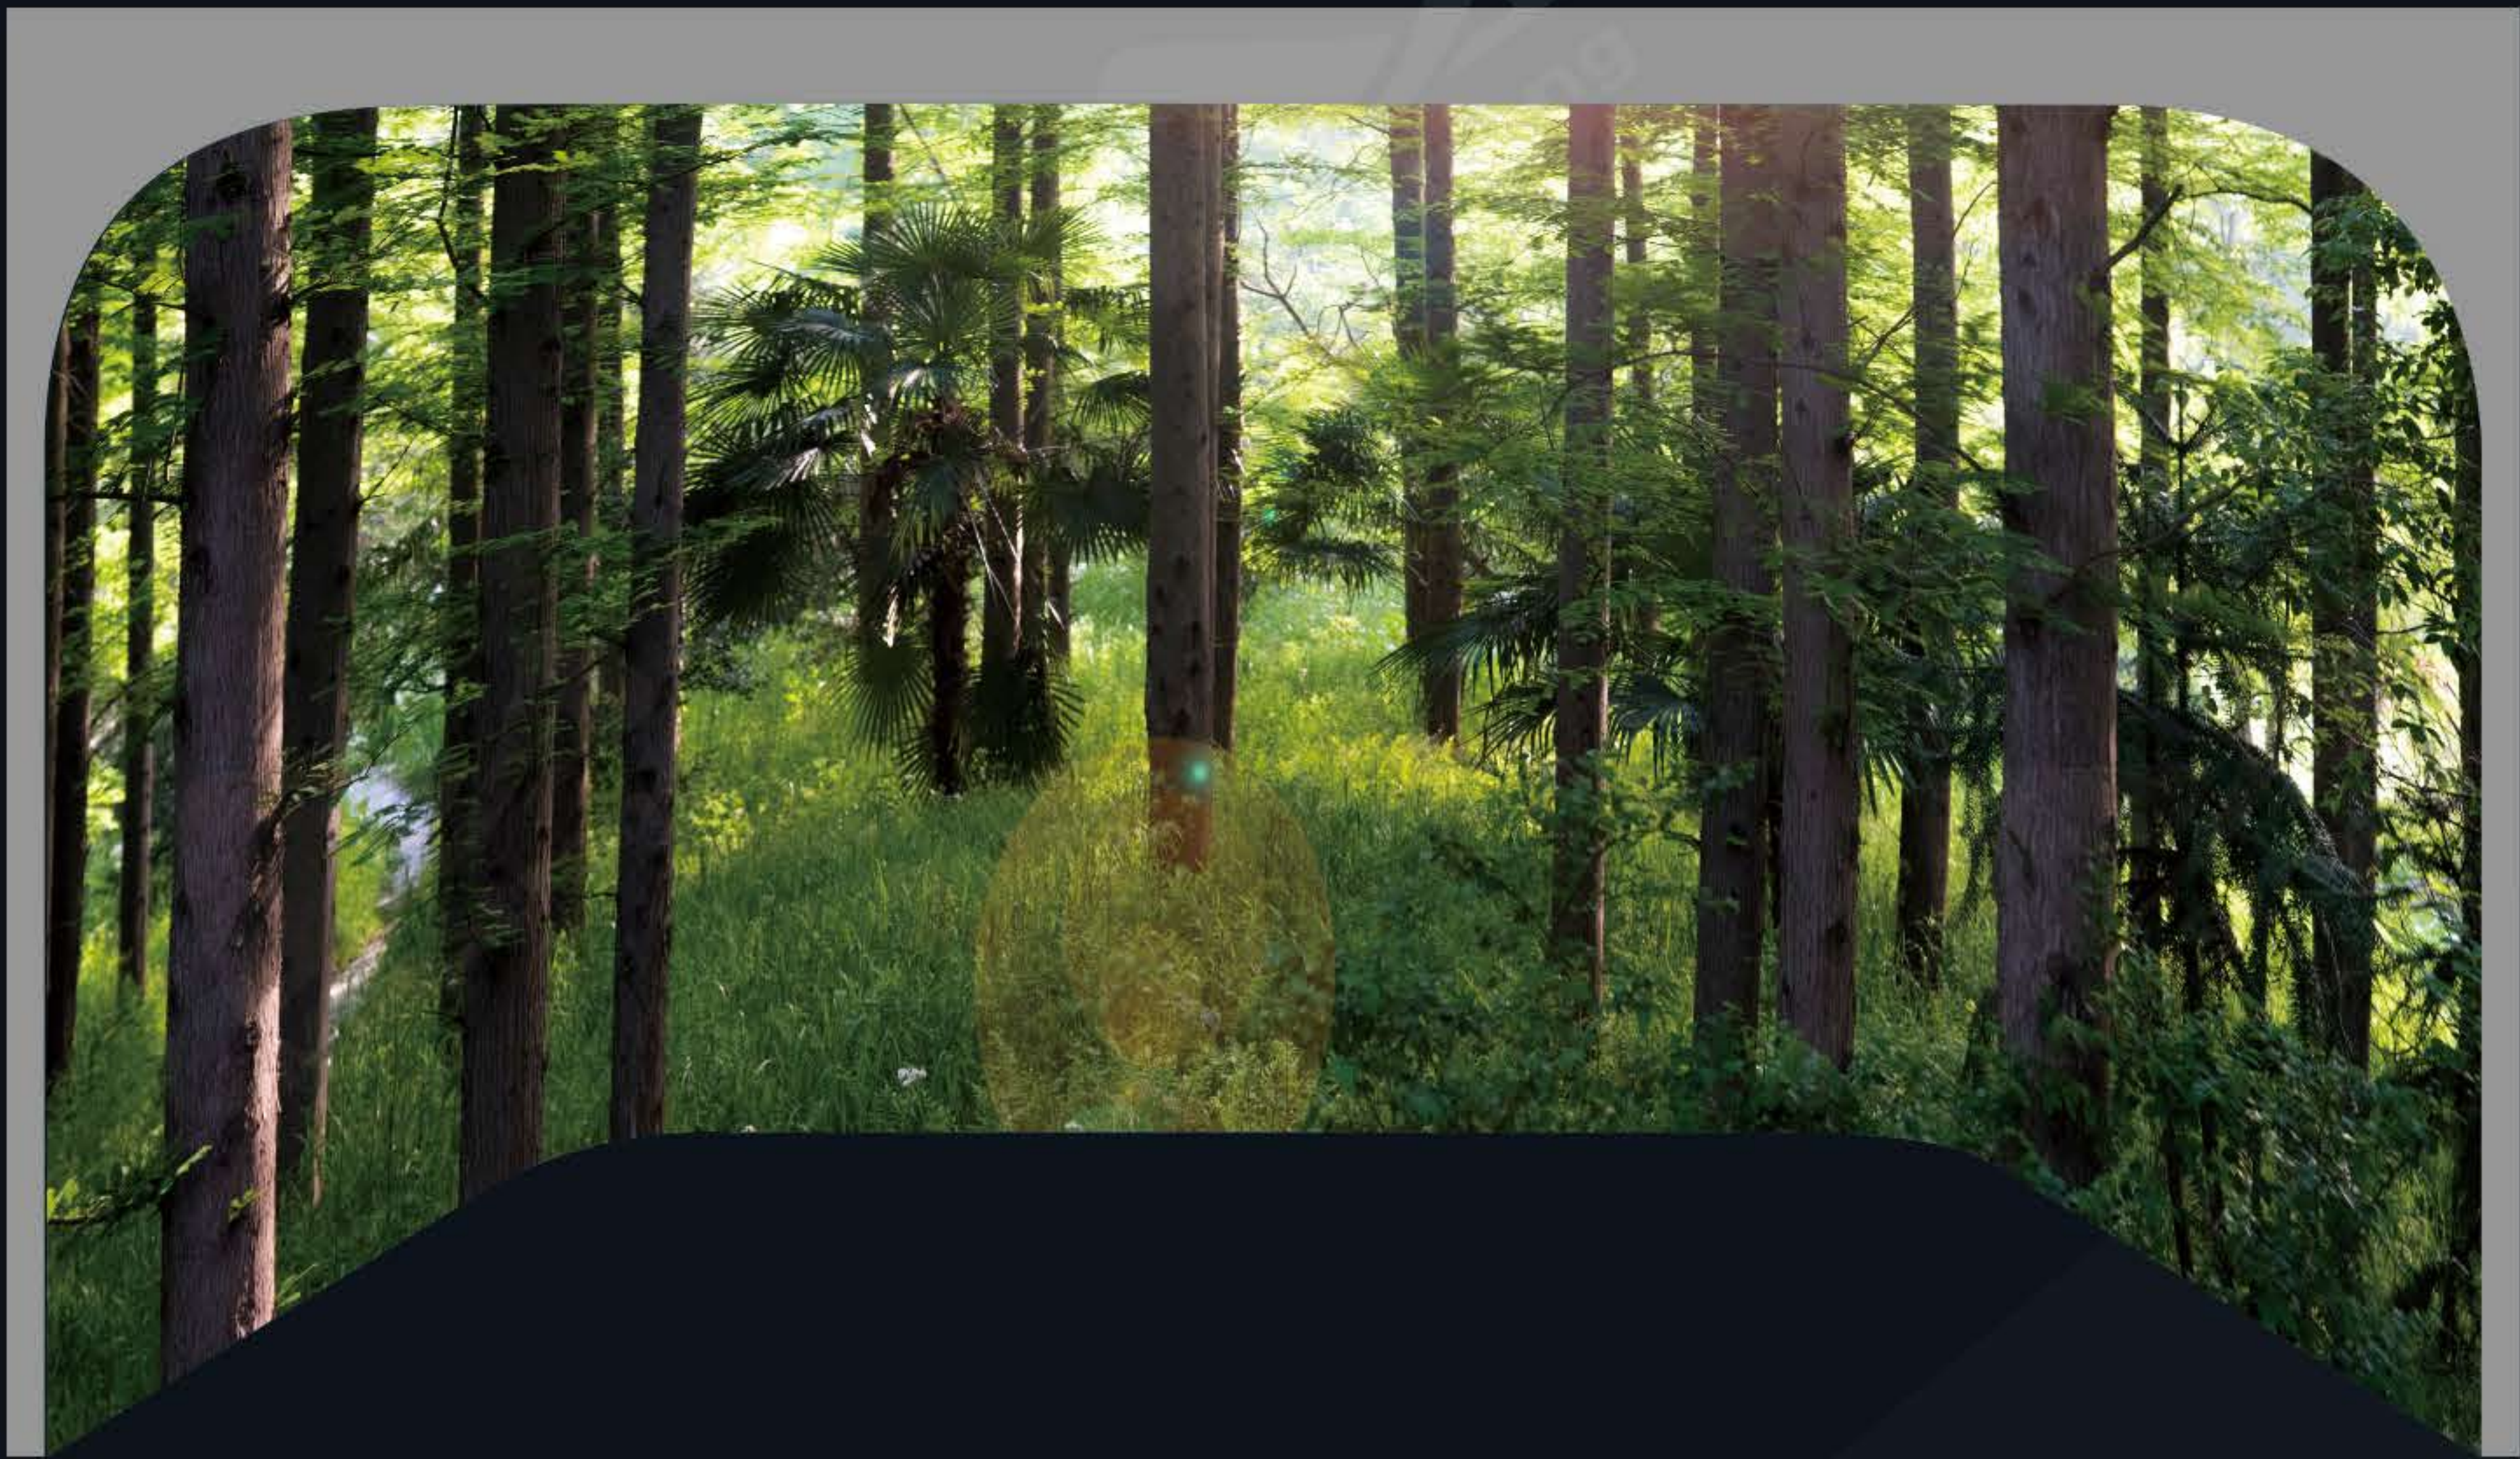

- Three side UHD wall screens
- One ceiling screen for vertical immersion
- Seamless content flow across all screens

Audience Experiences

- Fully enveloped in visual content
- Engaged from above and around
- Dynamic space transformation

USPs

- Perfect for large-scale installations
- Maximizes visual impact with vertical display

Four-Sided Immersive Display with Floor

What's a Four-Sided Immersive Display with Floor?

An immersive setup with three wall screens and one floor screen, surrounding viewers with engaging visuals from both the walls and beneath.

Features

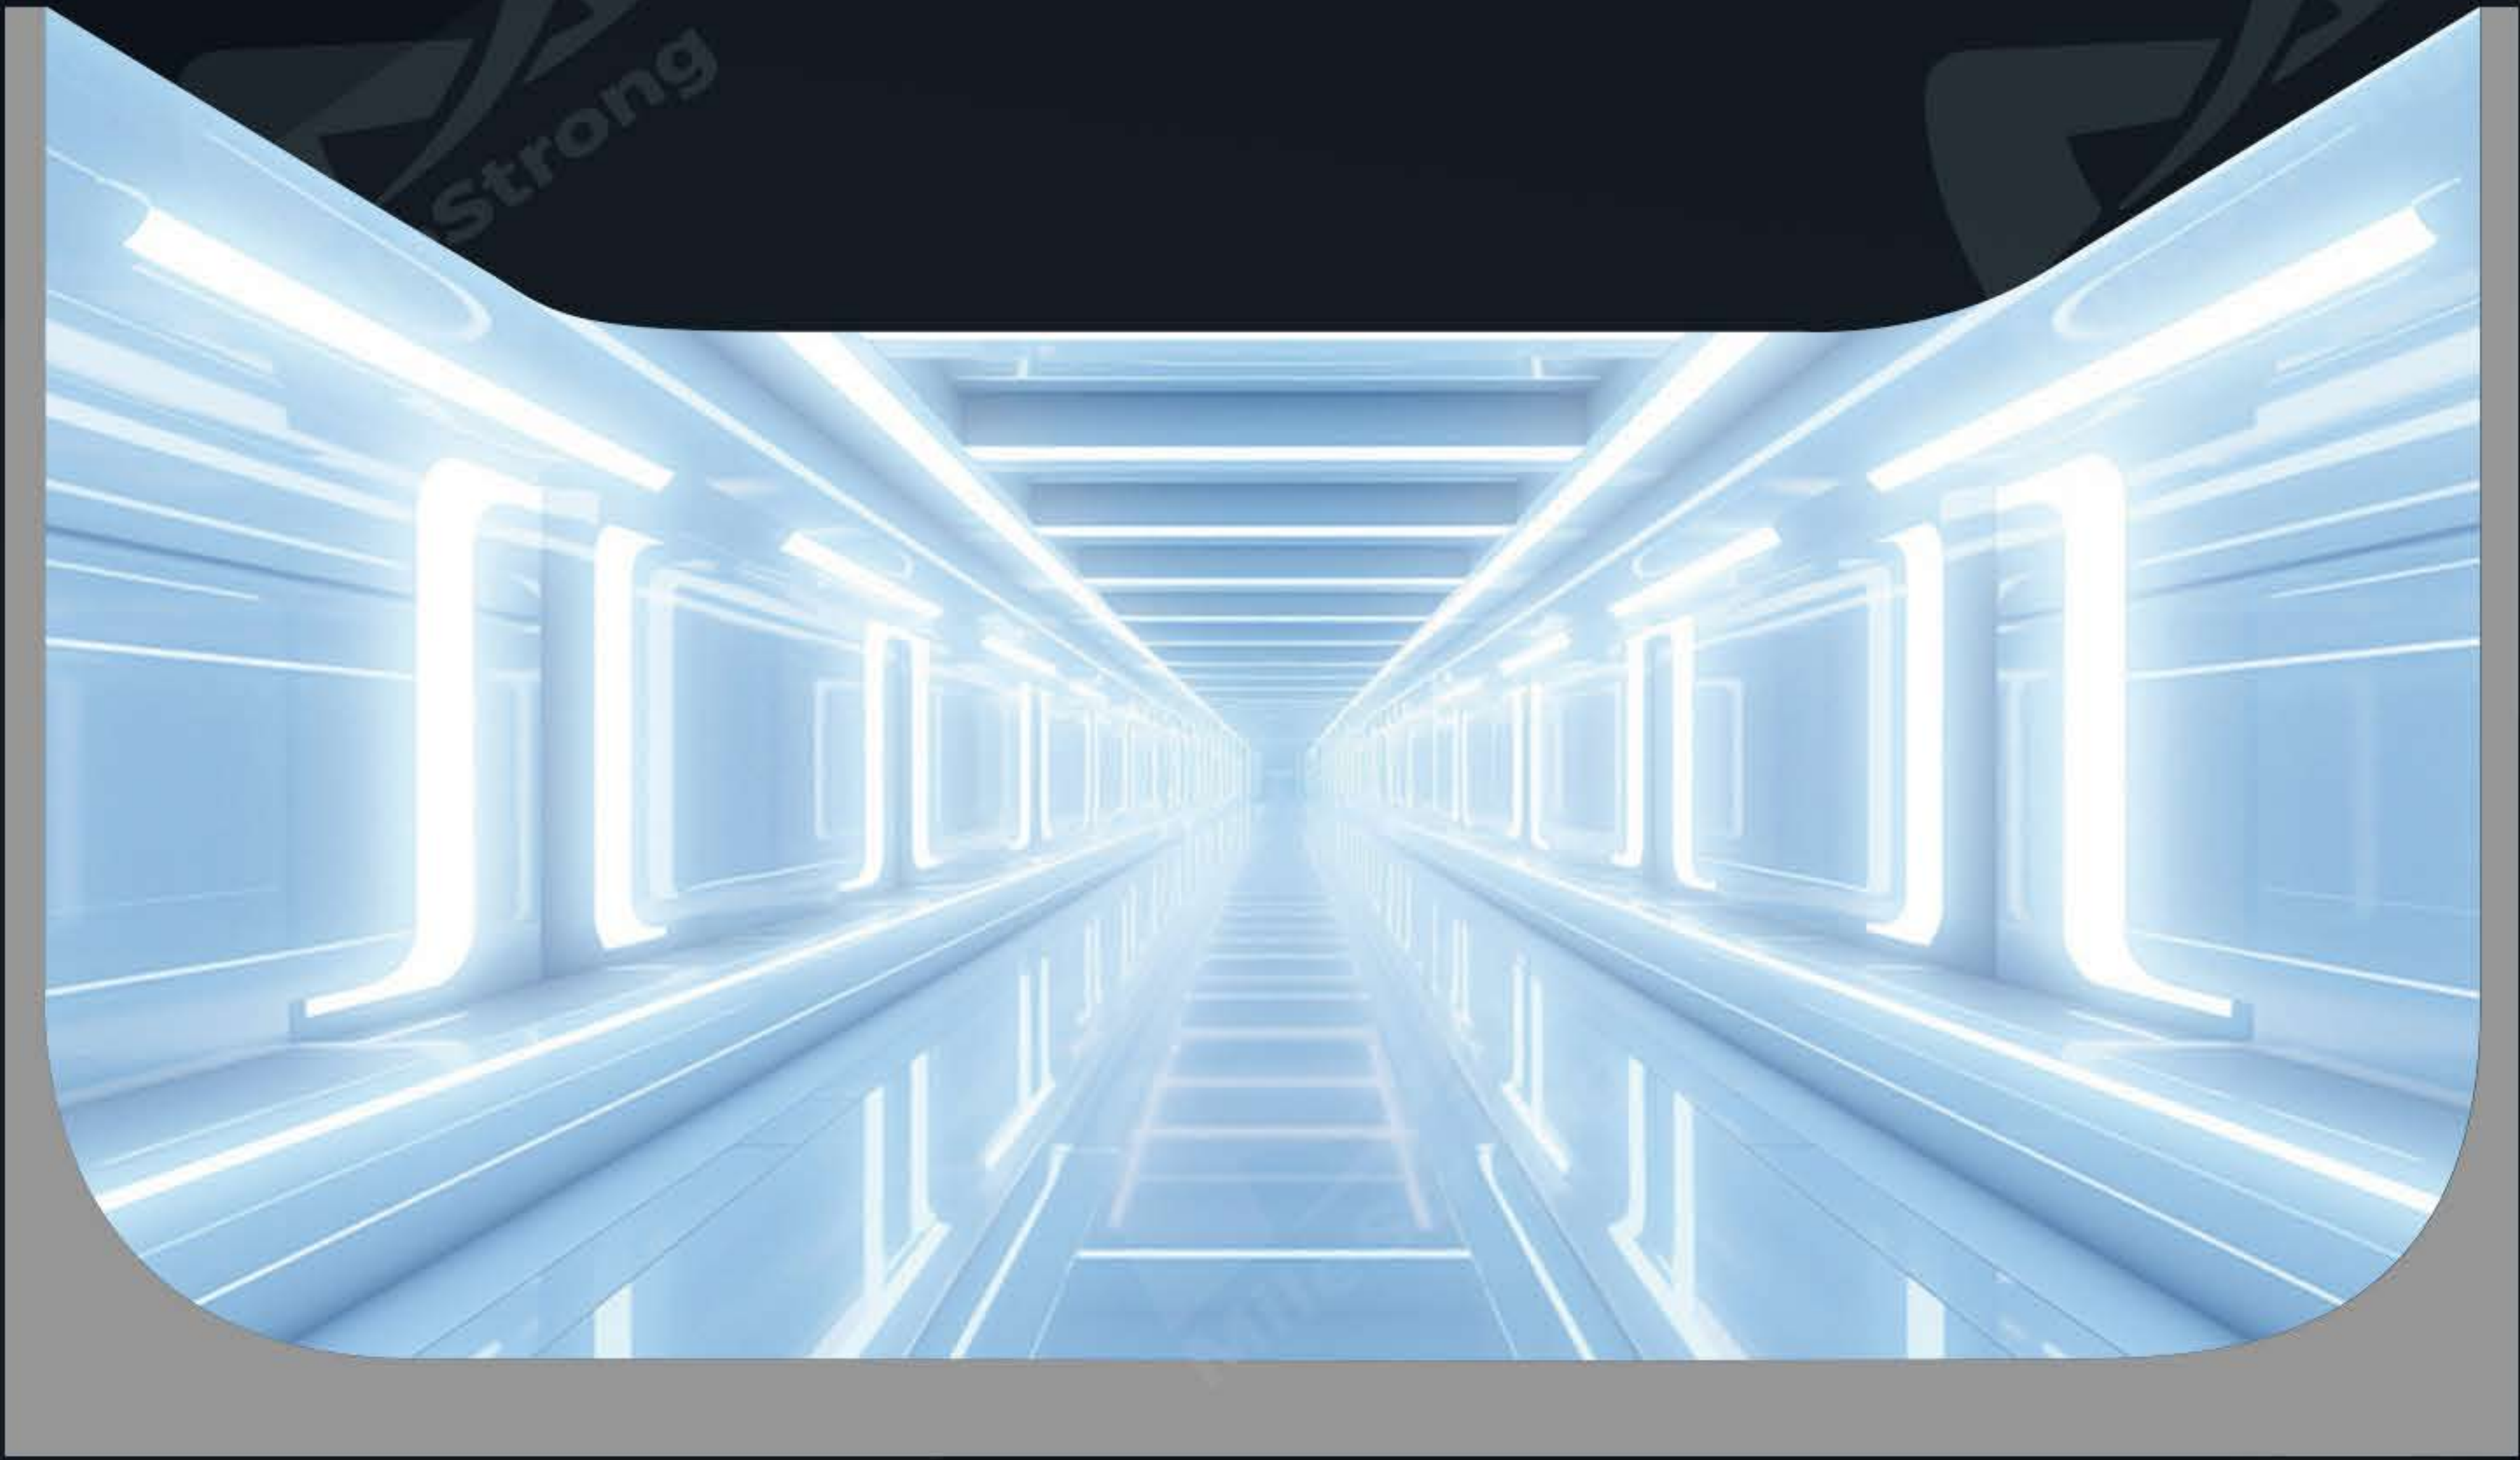

- Three high-quality wall screens
- One floor screen for full immersion
- Perfect synchronization across screens

Audience Experiences

- Immersive visuals from ground level
- Multi-dimensional content engagement
- Heightened sensory interaction

USPs

- Ideal for retail, entertainment, and exhibitions
- Space-saving with floor-based immersion

Five-Sided Immersive Arc Cave Display

What's a Five-Sided Immersive Arc Cave Display?

A fully immersive digital experience, combining one floor screen, one ceiling screen, and three wall screens for complete audience engagement from every angle.

Features

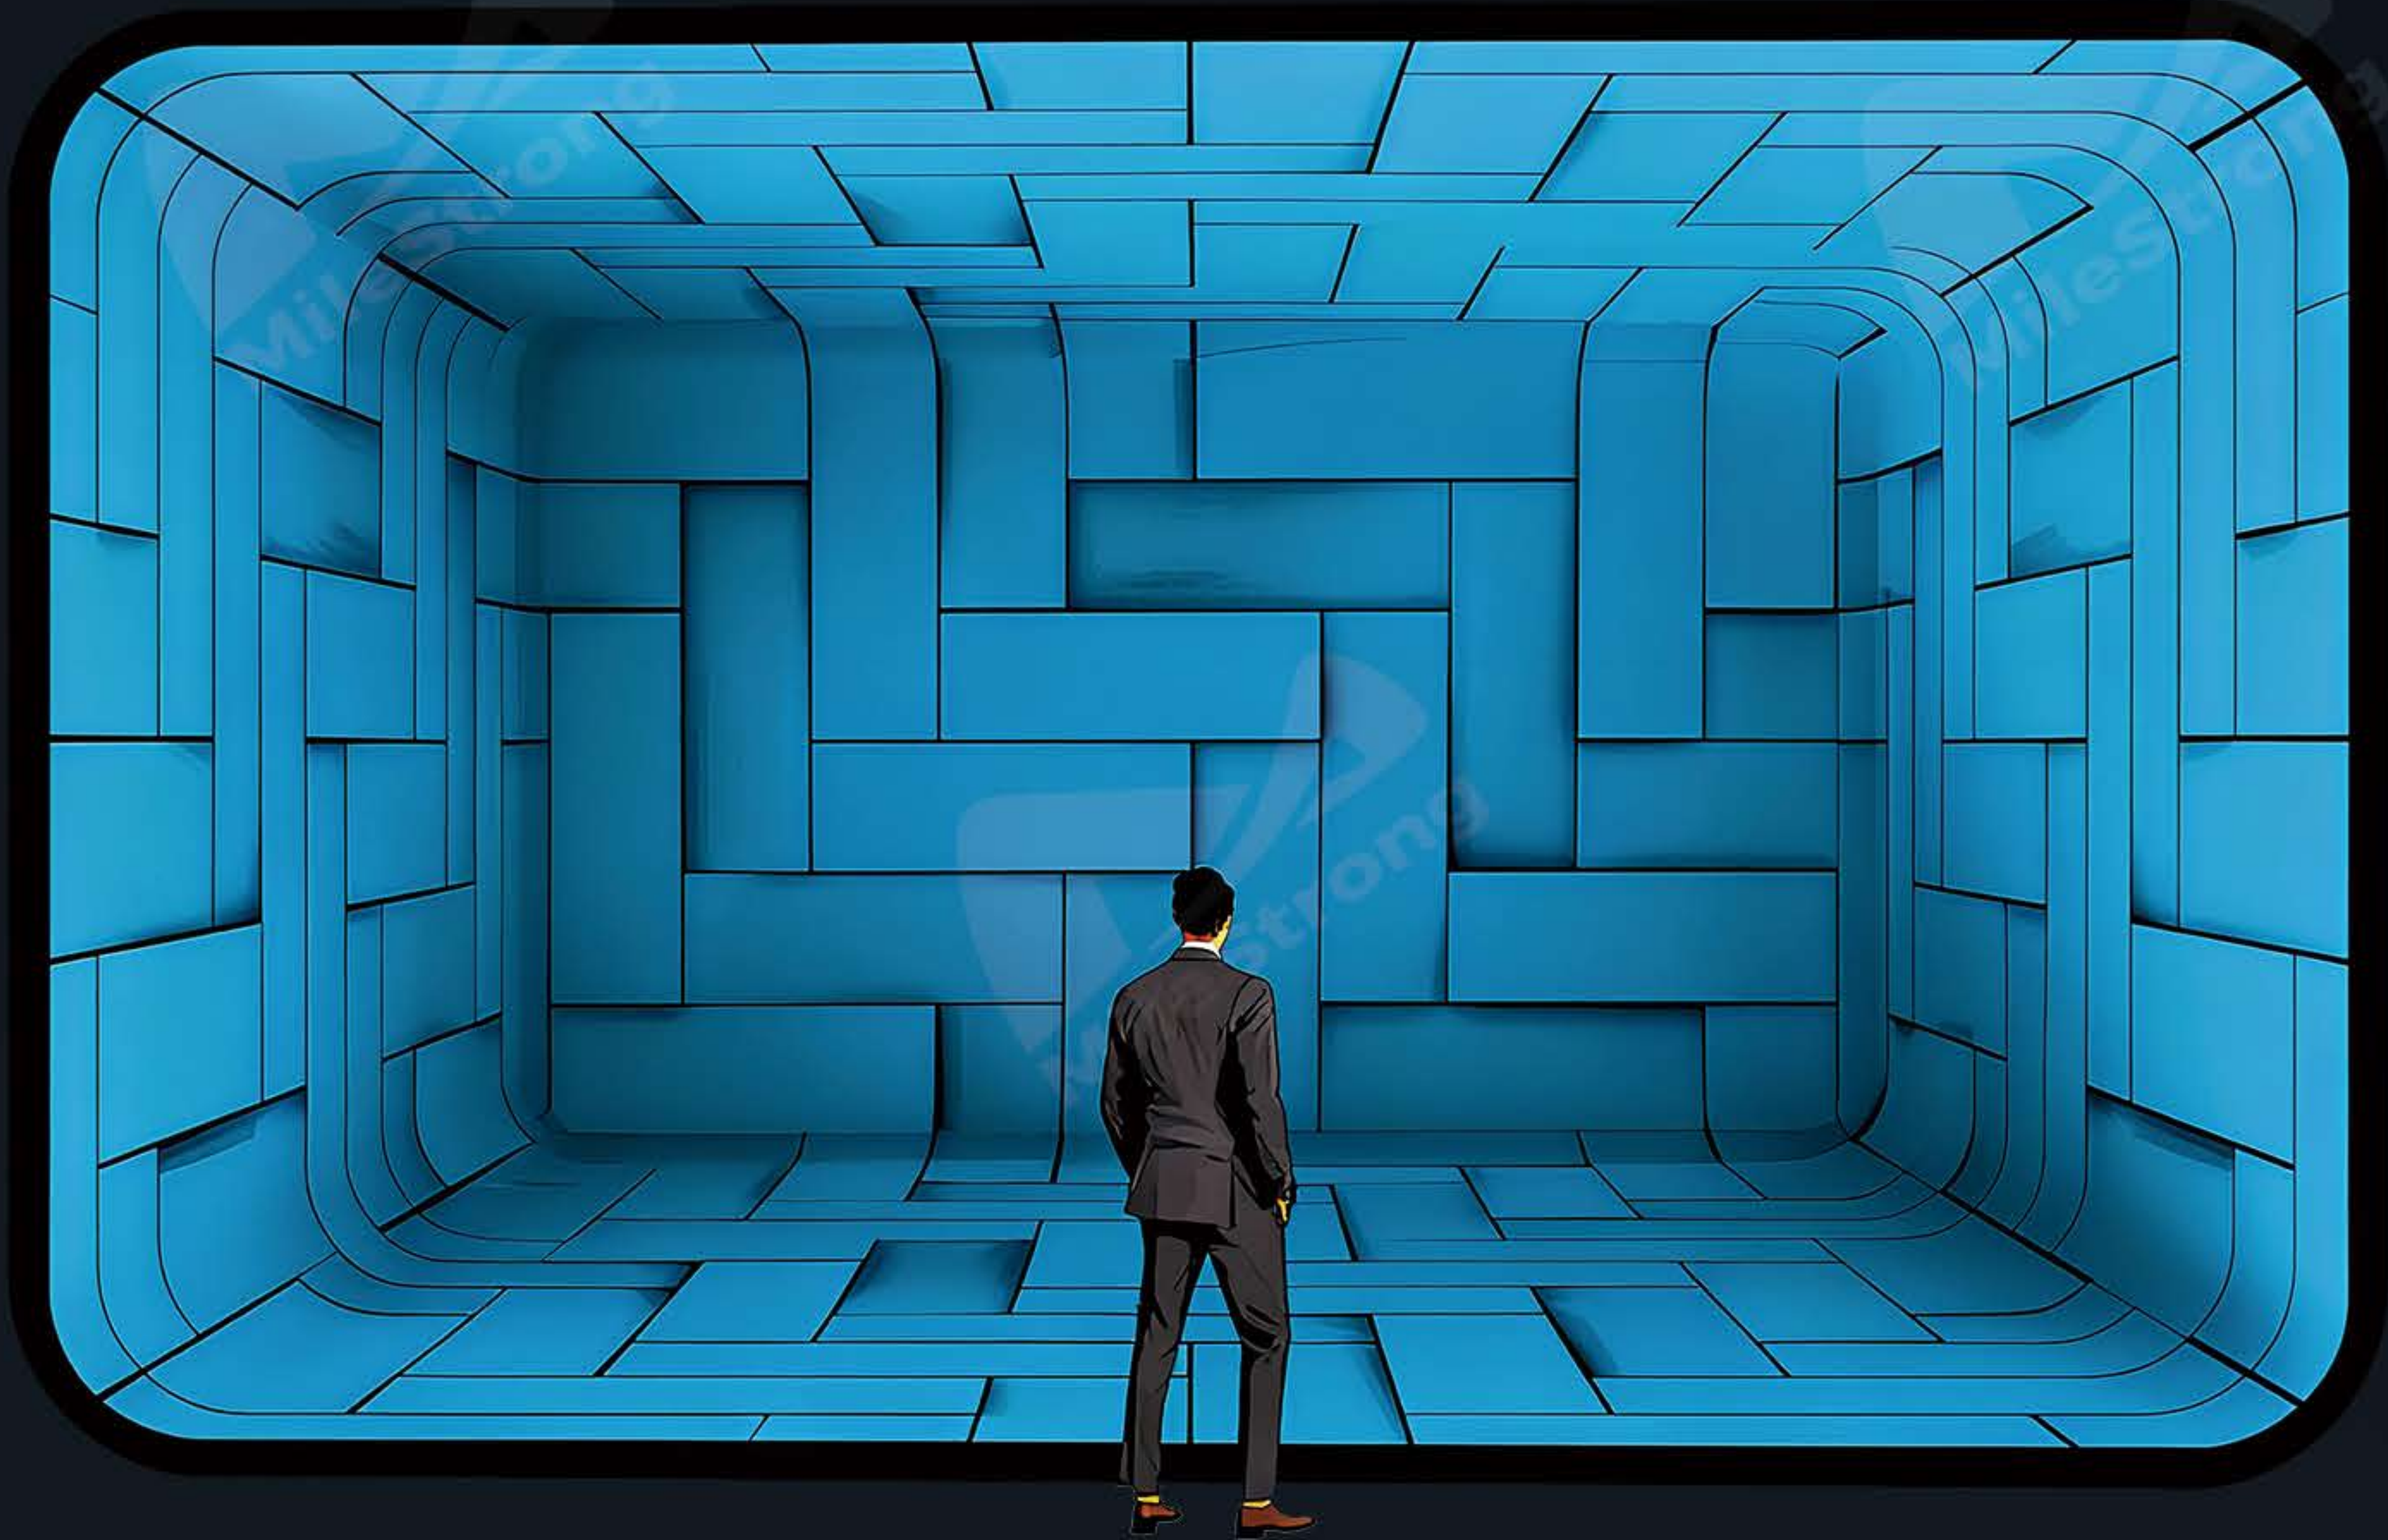

- Ultra-high resolution & seamless visual transitions
- Curved display for enhanced depth perception and realism
- Advanced calibration for flawless content synchronization

Audience Experiences

- Immersed from all directions
- Full engagement with the content
- Multi-sensory interaction with 360° visuals

USPs

- Creates an unparalleled immersive environment
- Suitable for high-end events and exhibitions

Visual Excellence

Smooth & Seamless

Customized flexible modules effectively eliminate creases and right-angle patchwork, delivering smooth, uninterrupted visuals.

Immersive Experience

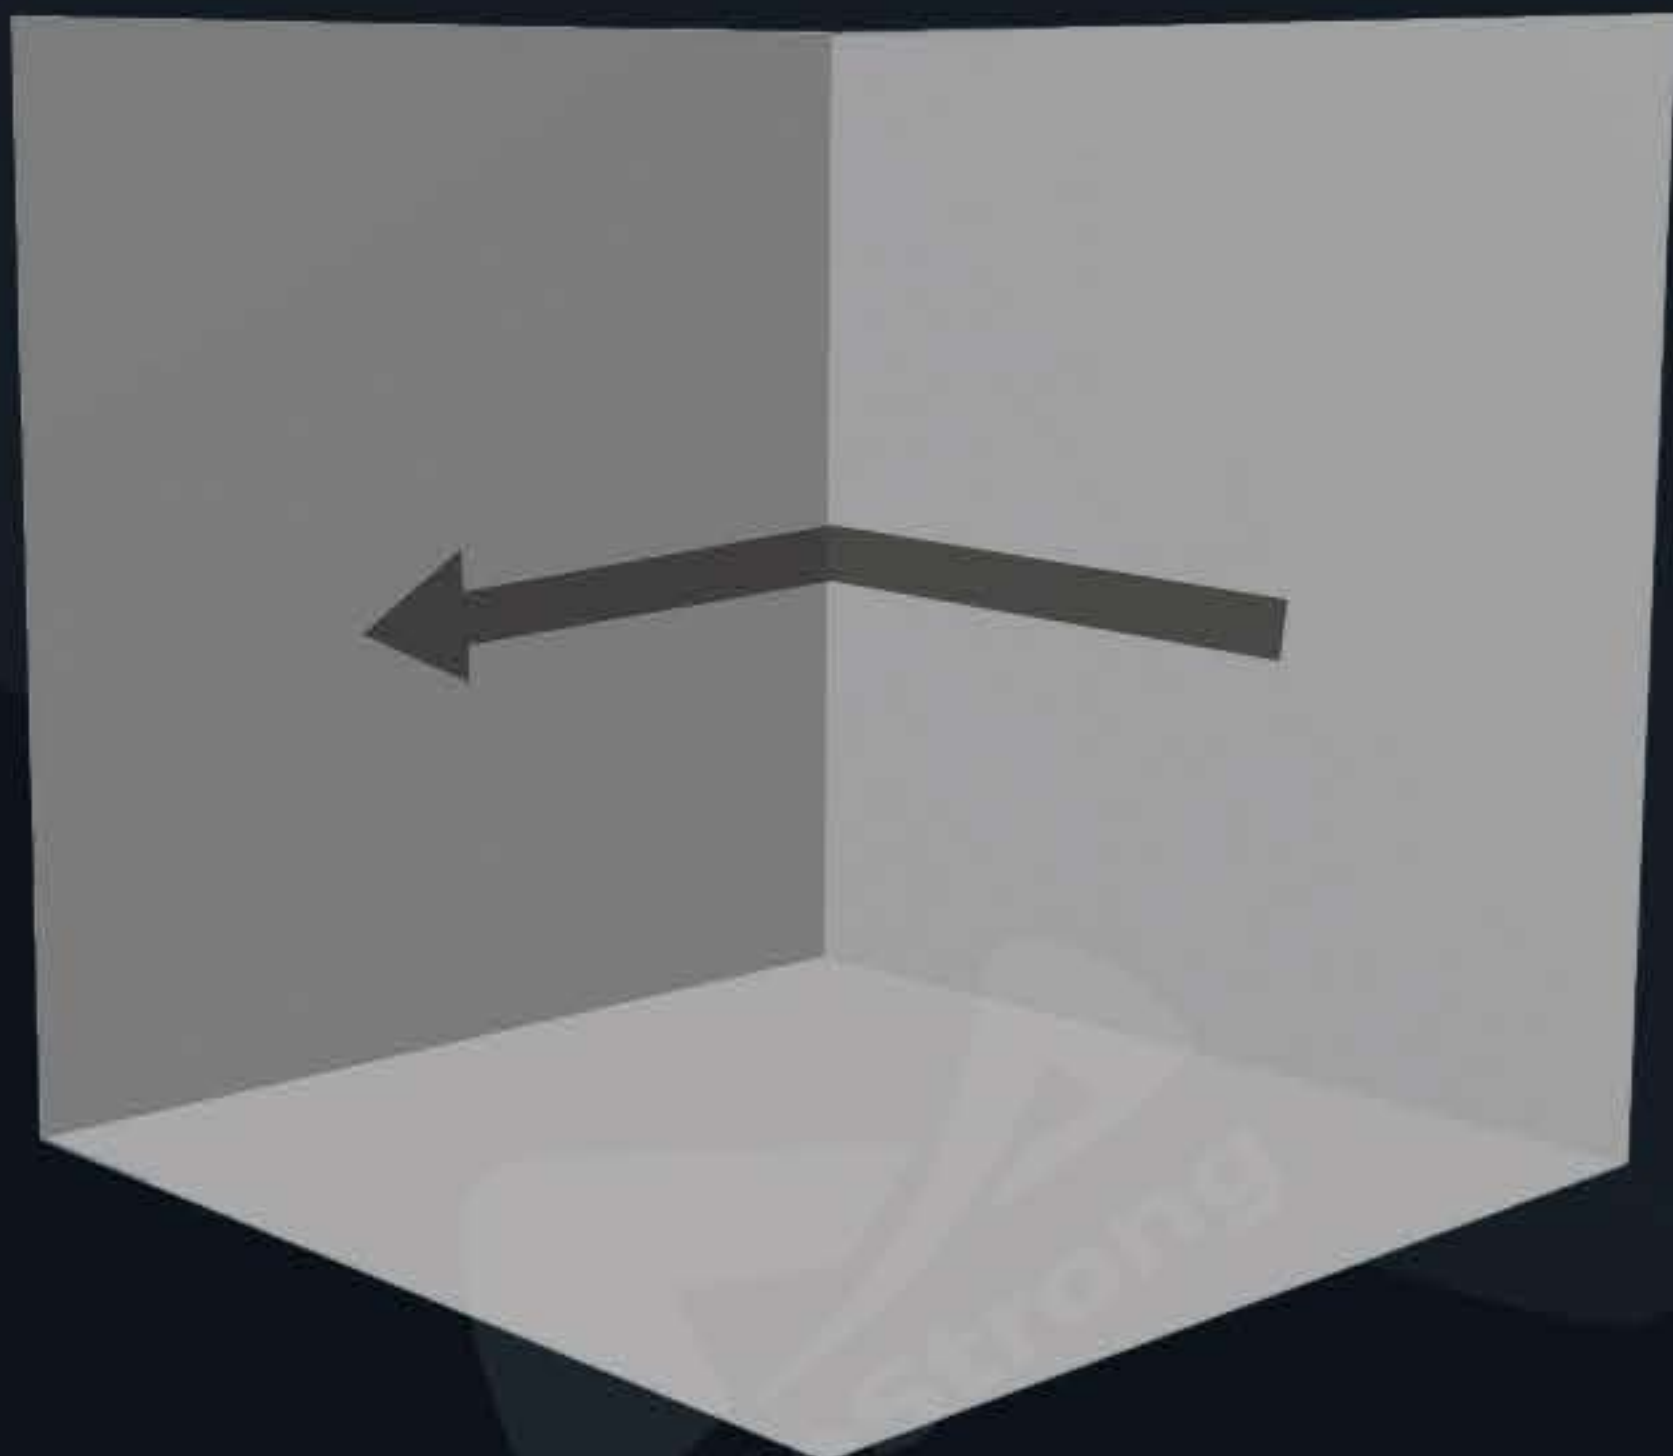

No distortion, edges, or corners in the display, offering a truly immersive and undisturbed viewing experience from every angle.

Color Accuracy

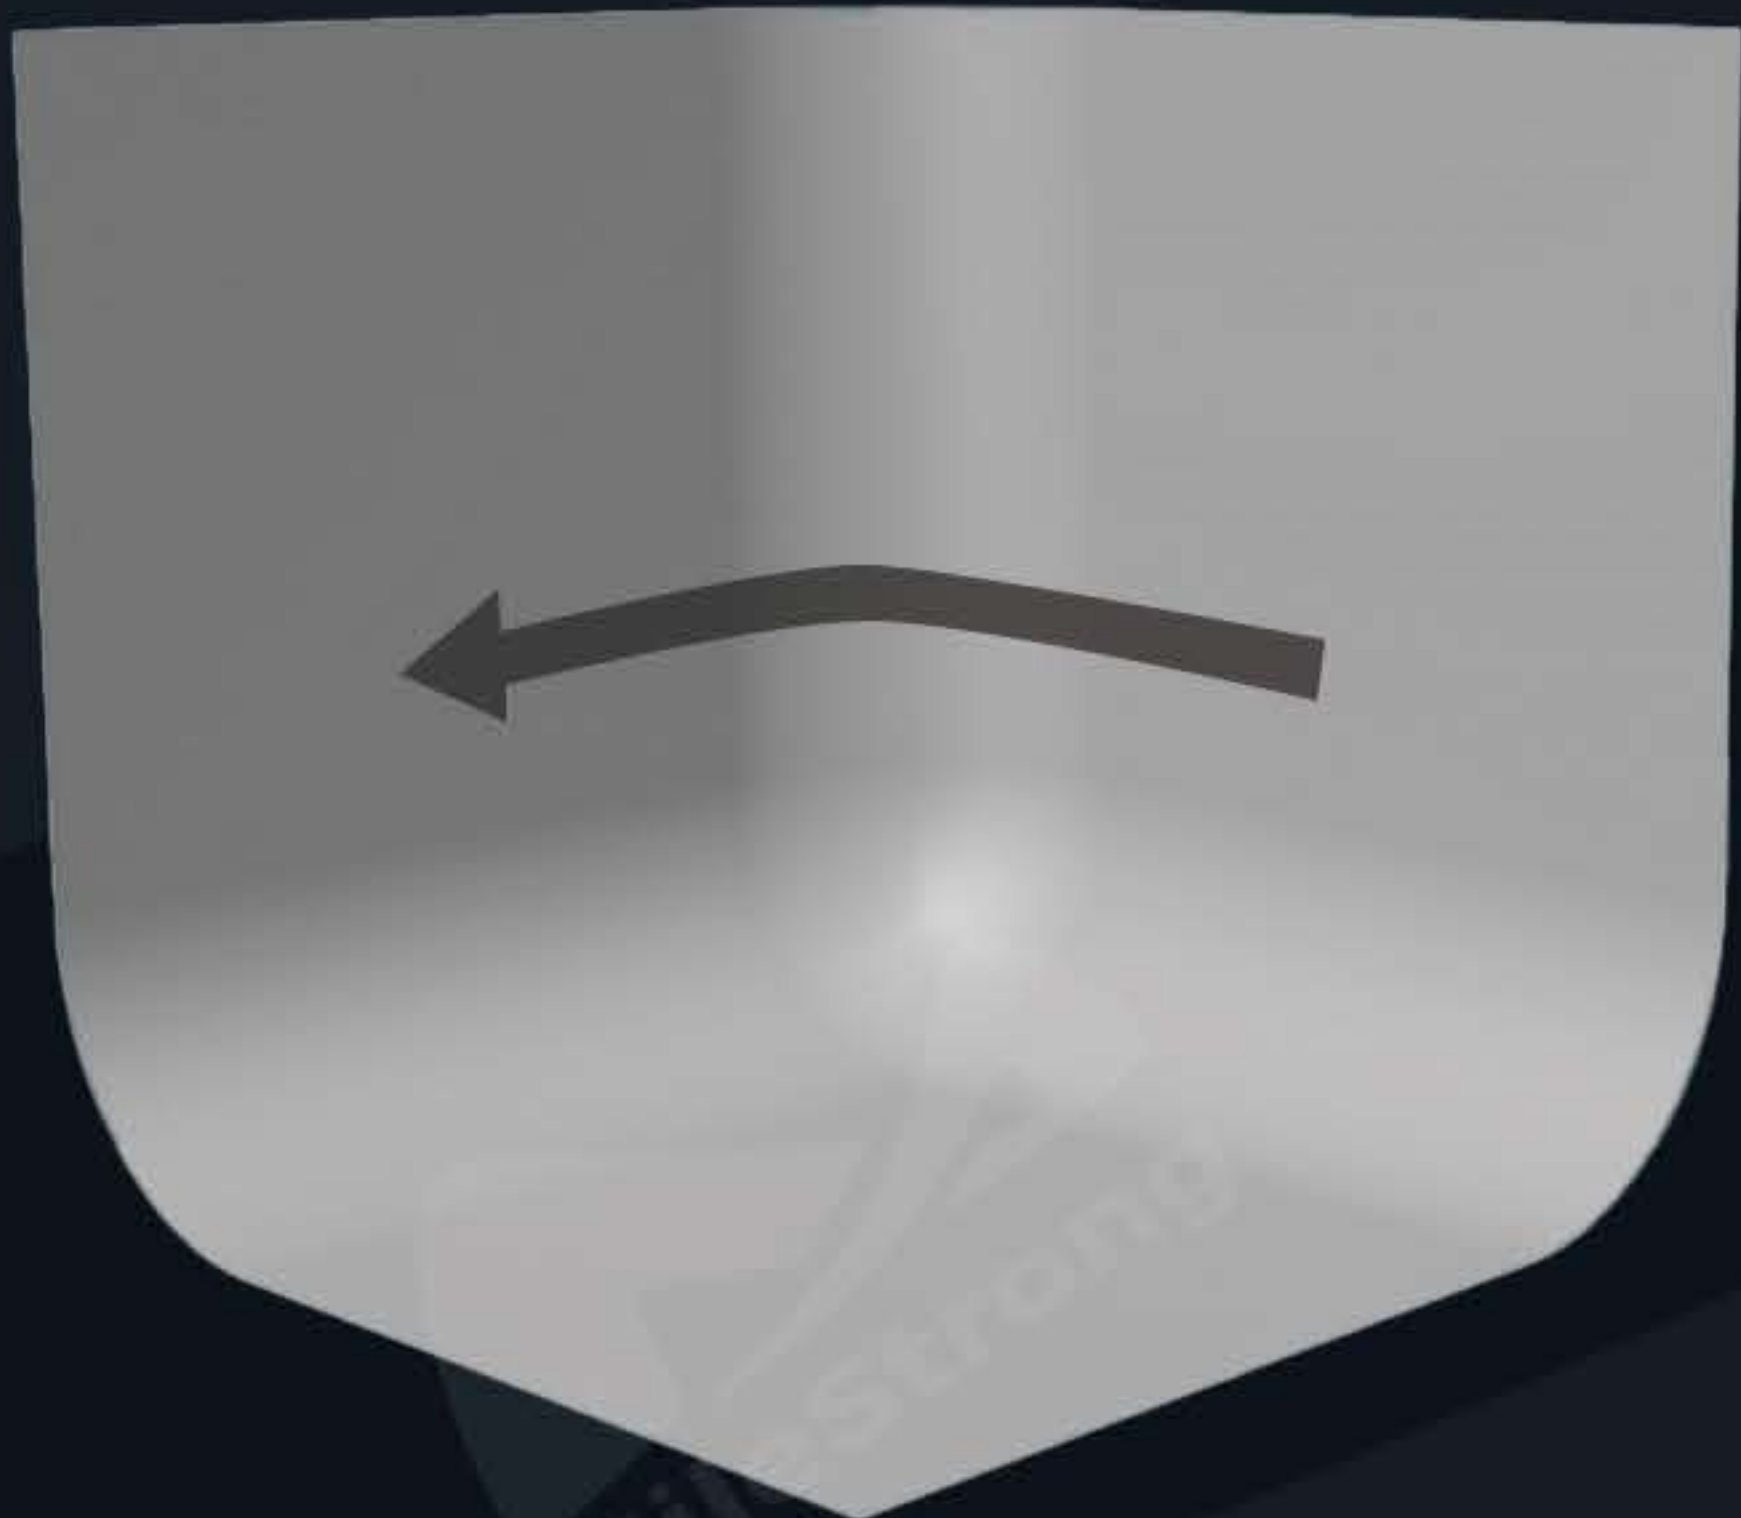

Enjoy finely tuned picture quality with no color differences, ensuring a more comfortable and vividly realistic visual experience.

Extended Range

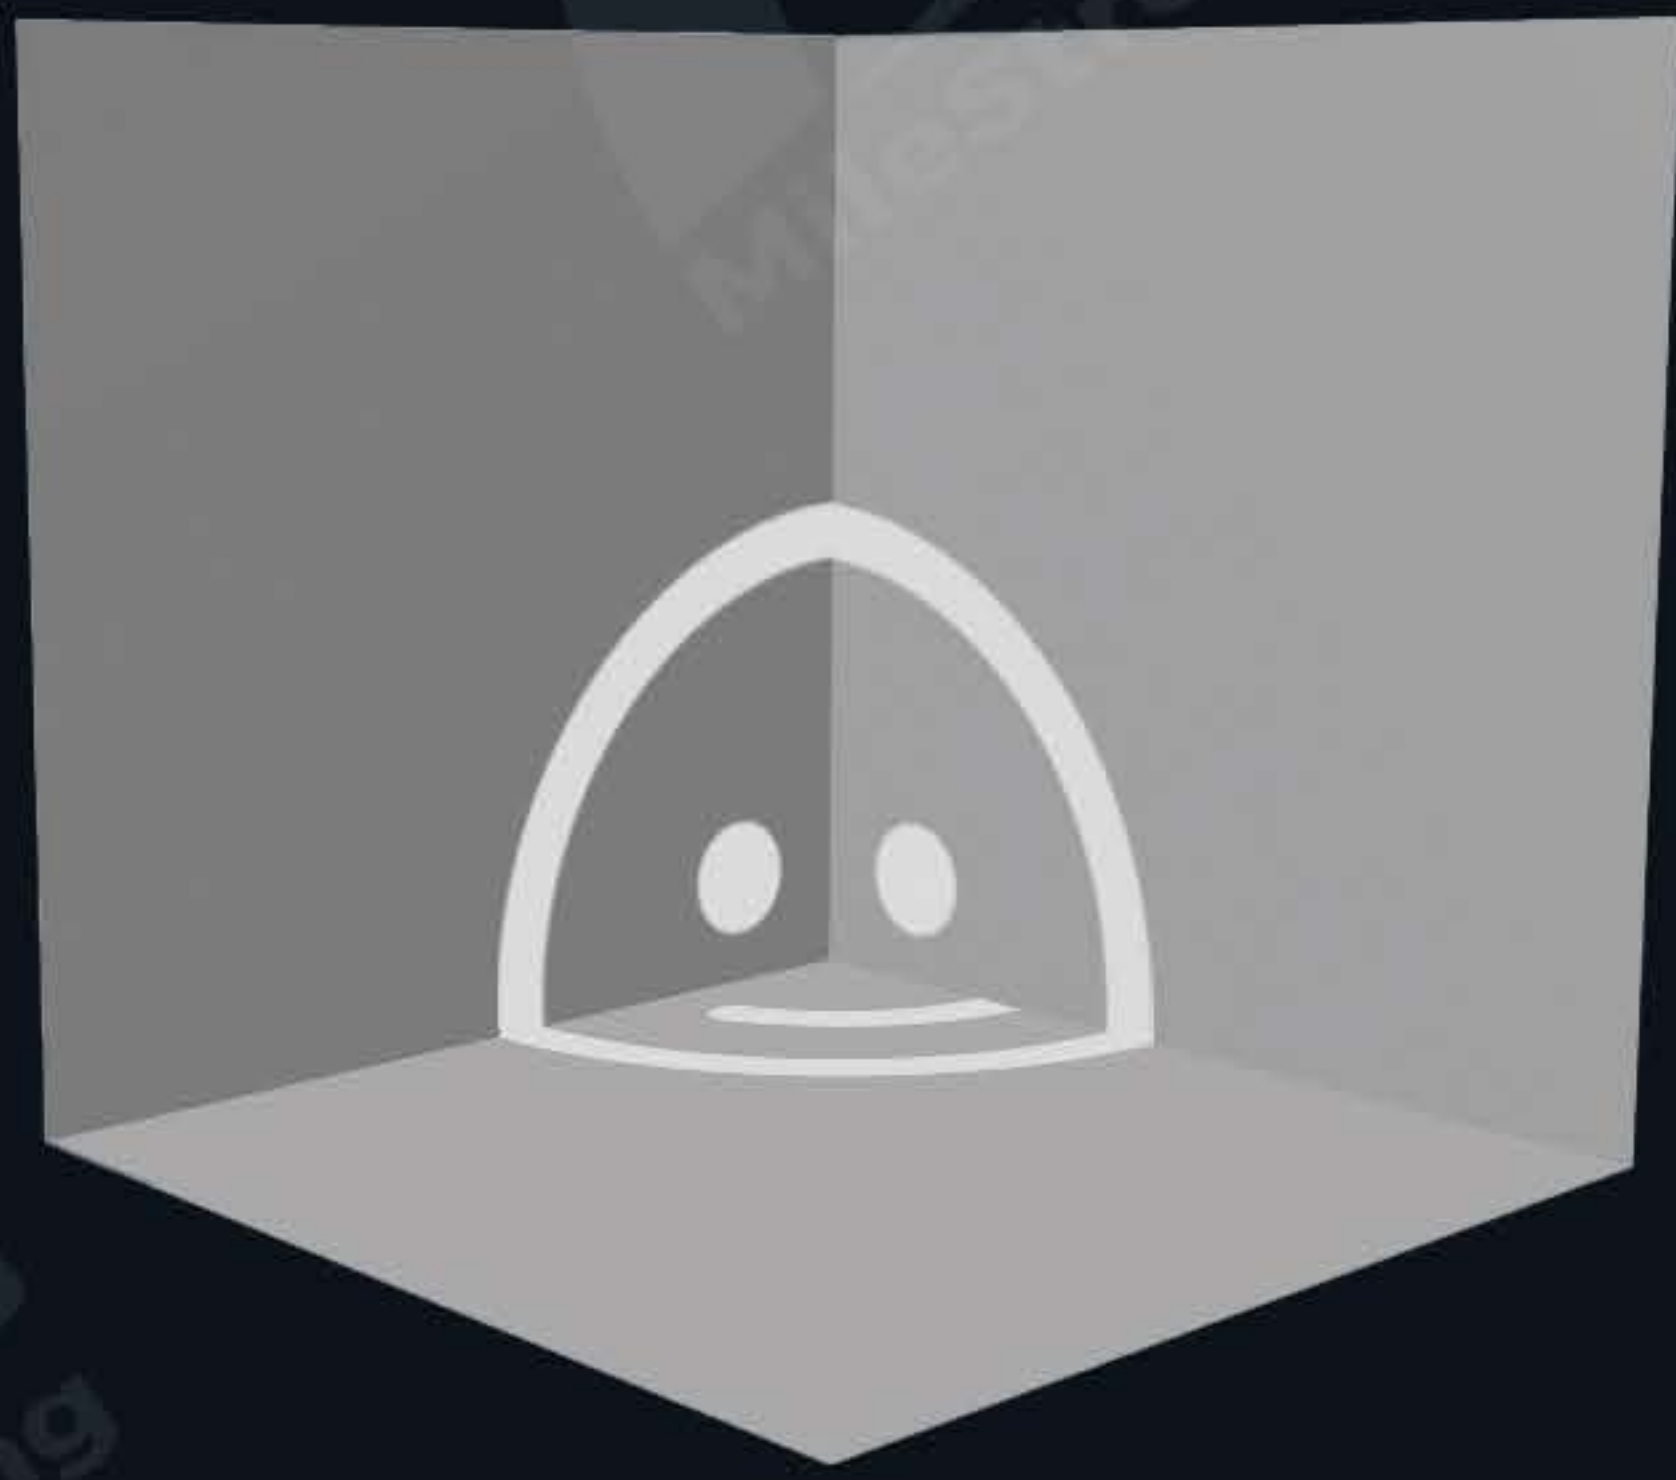

The innovative design expands the optimal viewing range, allowing multiple viewers to enjoy clear and immersive content simultaneously.

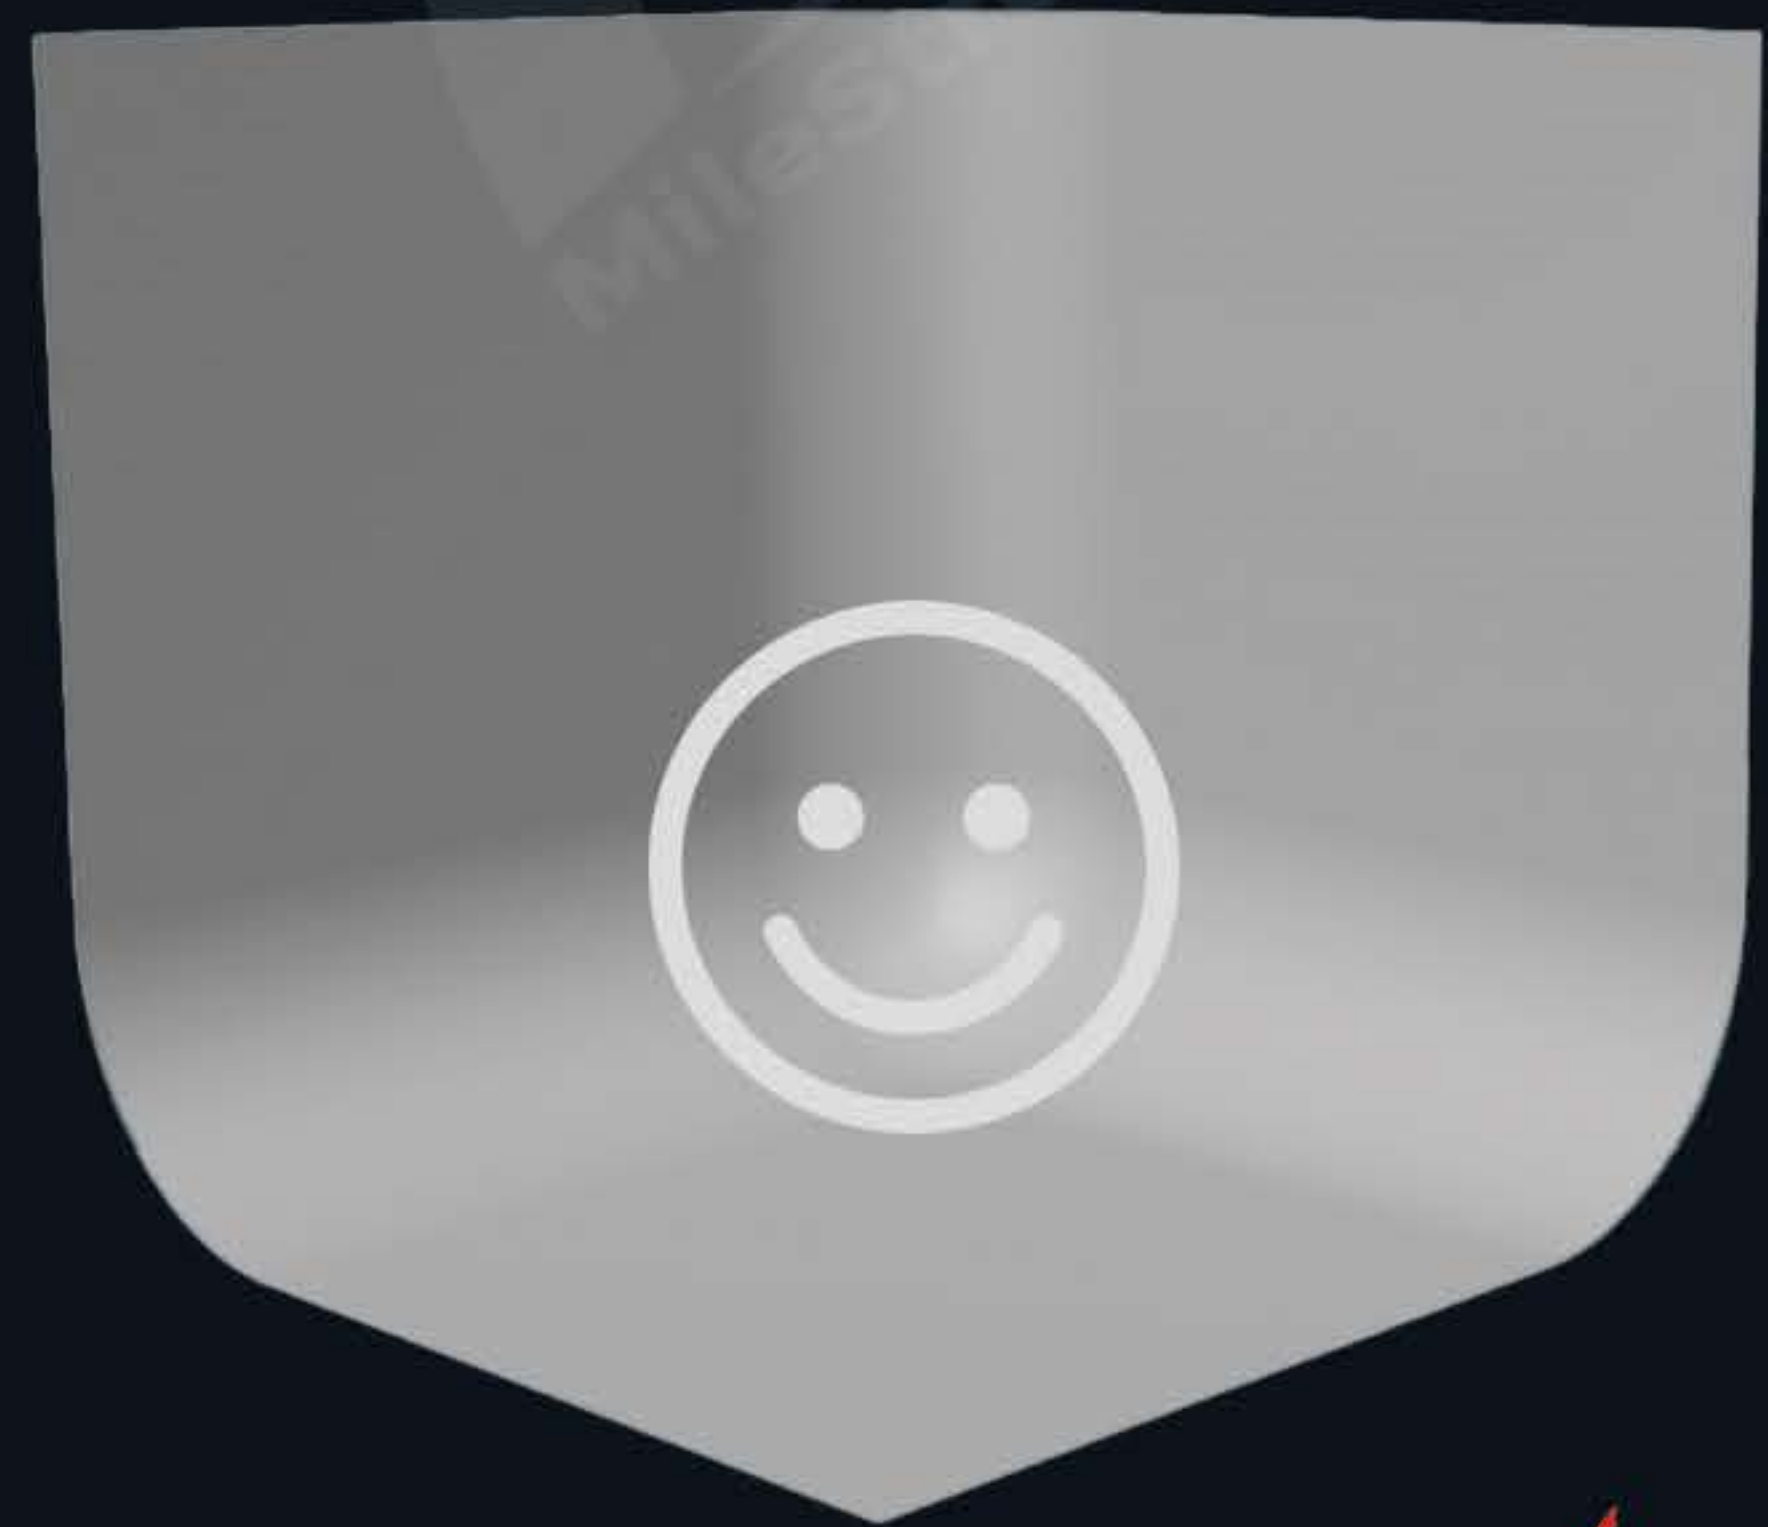

The right angle picture is excessively creased ❌

The right angle picture is excessive without creases ✅

The picture is distorted ❌

No distortion in the picture ✅

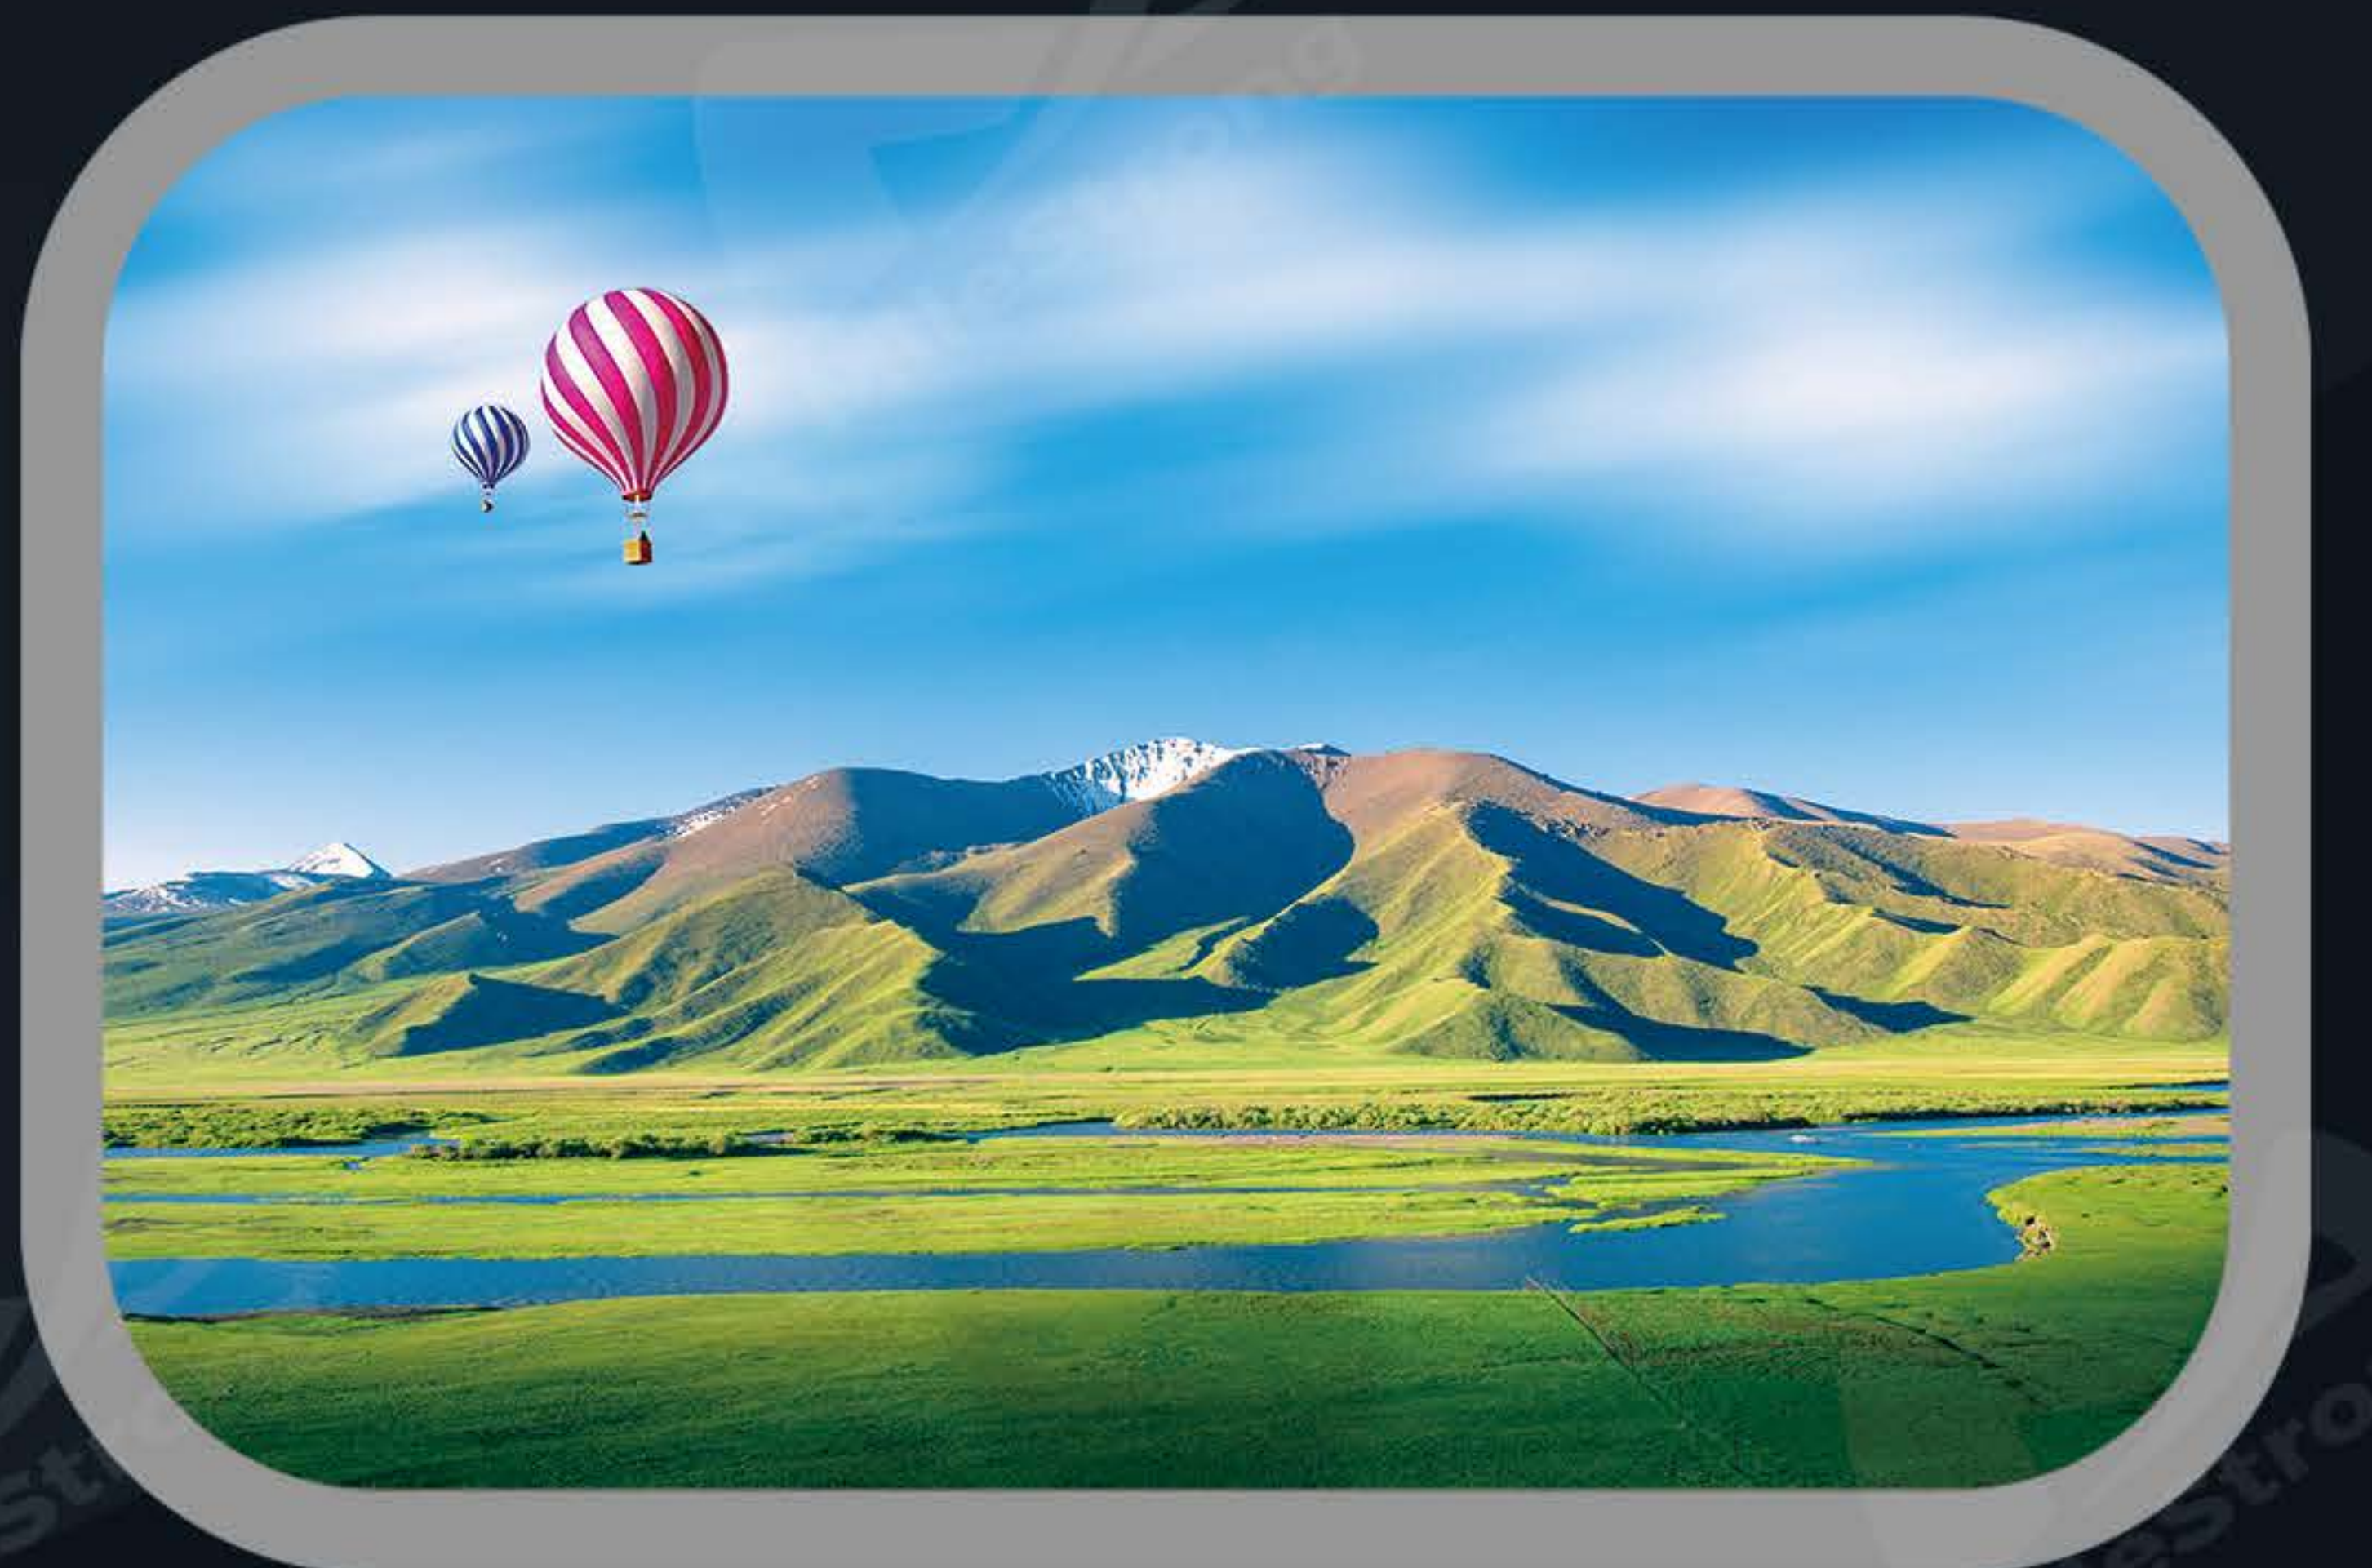

There is obvious color difference in the picture ❌
